

Oil Guard

Oil Guard's compact and modular design allows it to sit unobtrusively in the corner of any workshop. Its patented technology lets you process any oil and water condensate to allow clear water to go straight to the drain while retaining the oil eliminating the risk of penalties or fines.

Features & Advantages

- Complies with most local water regulation for disposal of effluent
- All plastic construction-fully recyclable
- Compact design-wall mounted-no loss of floor area
- Oil absorbed cartridge-simple push on cartridge
- No maintenance between system cartridge change because:
 - No moving parts
 - No adjustment
 - No presoaking of carbon
 - No stagnant water

Oil Guard Assembly

Changing Of the Separator Cartridge

Period change of the separator will depend on the quantities of oil being passed through the system
One separator cartridge will absorb a minimum of 6 litres of oil.

The separator cartridge requires replacing when-

On first indication of the water from the system appearing cloudy

If a optional indicator sensor is fitted, this will indicate for a replacement.
